

Designing a Playful Solution

for Gotlands Förenade Besöksnäring

Alex, August, Alice, Joel

Contents

1. Why are we here: the problem
2. What do we offer: the solution
3. Why choosing a playful approach?
4. Invitation phase
5. Exploration phase
6. Immersion phase
7. Limitations of the solution
8. Possible scaling/development

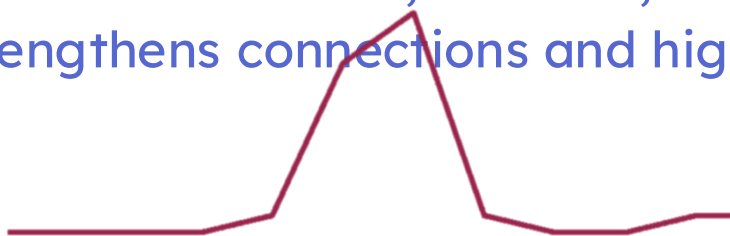

Why are we here?

- A plan to improve tourism on Gotland by 2030, making it the best and most sustainable destination in Sweden
- Vision 2030 is long, abstract, and hard to engage with
- 120+ members, limited time, high seasonal pressure
- Sombrero problem
- Need for awareness + collaboration without extra meetings

Goal: Social and ecological sustainability.

Our solution: a fun, low-cost, single-session playful event that strengthens connections and highlights Vision 2030 themes.

Why choosing a playful approach?

- Playfulness is a state of consciousness
- It can be trained
- Creativity up, inhibition down, collaboration up

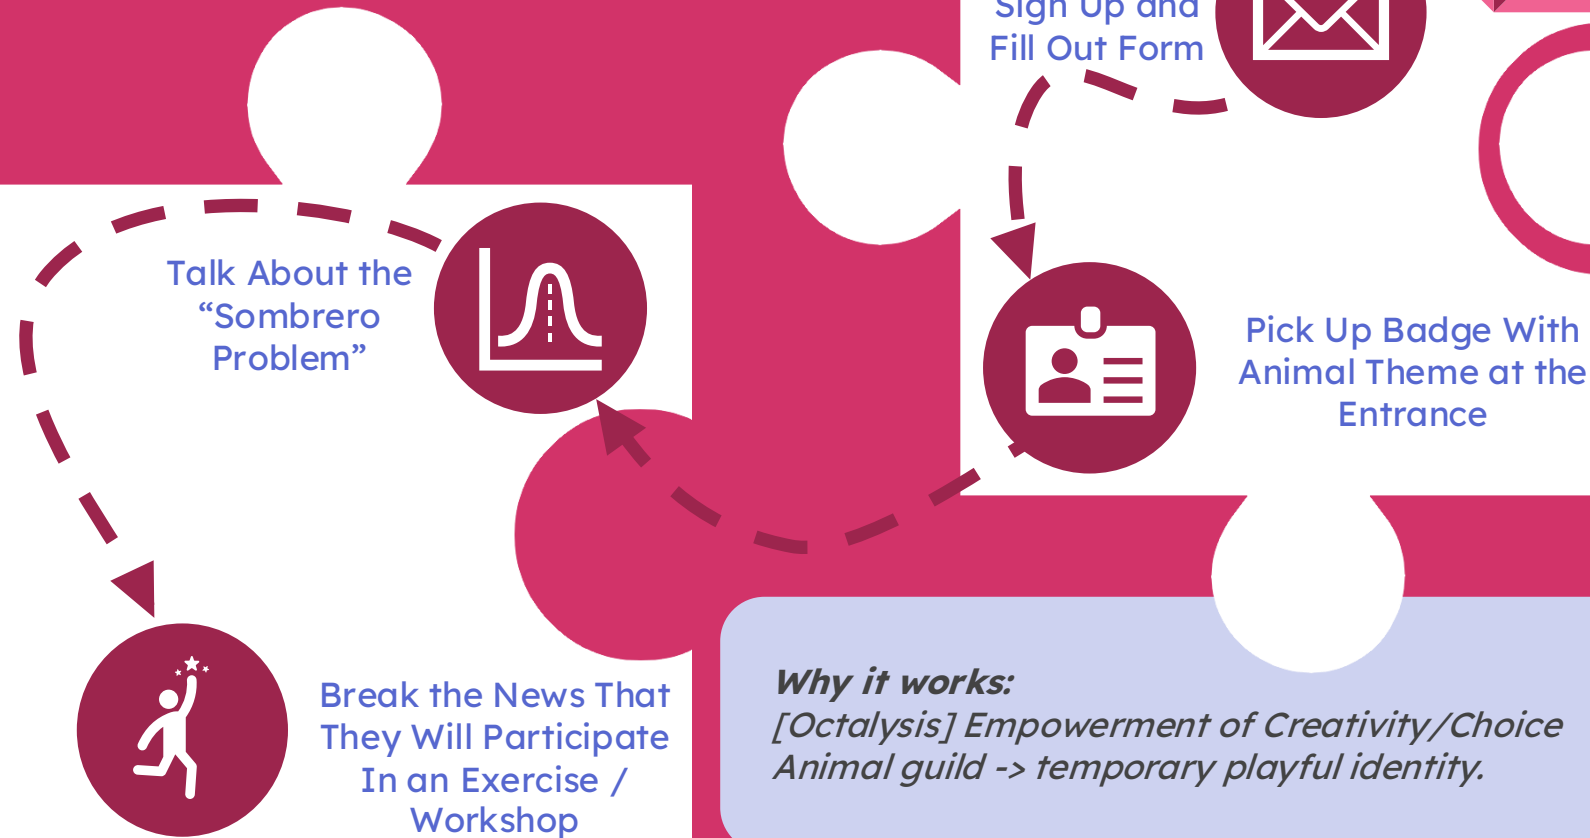

The Court of Gotlandic Animals

Collaborative quest!

Pre Event
Setup
Workshop
Conclusion

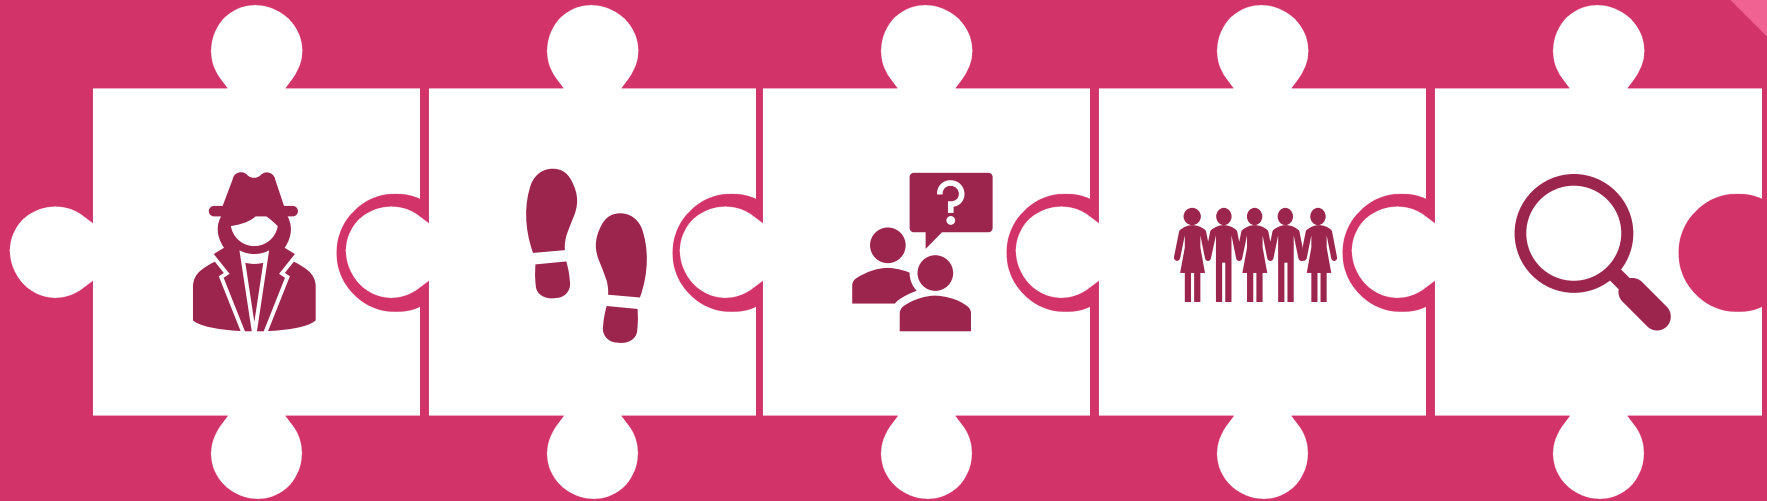

Invitation

Why it works:

*[Octalysis] Empowerment of Creativity/Choice
Animal guild -> temporary playful identity.*

Exploration

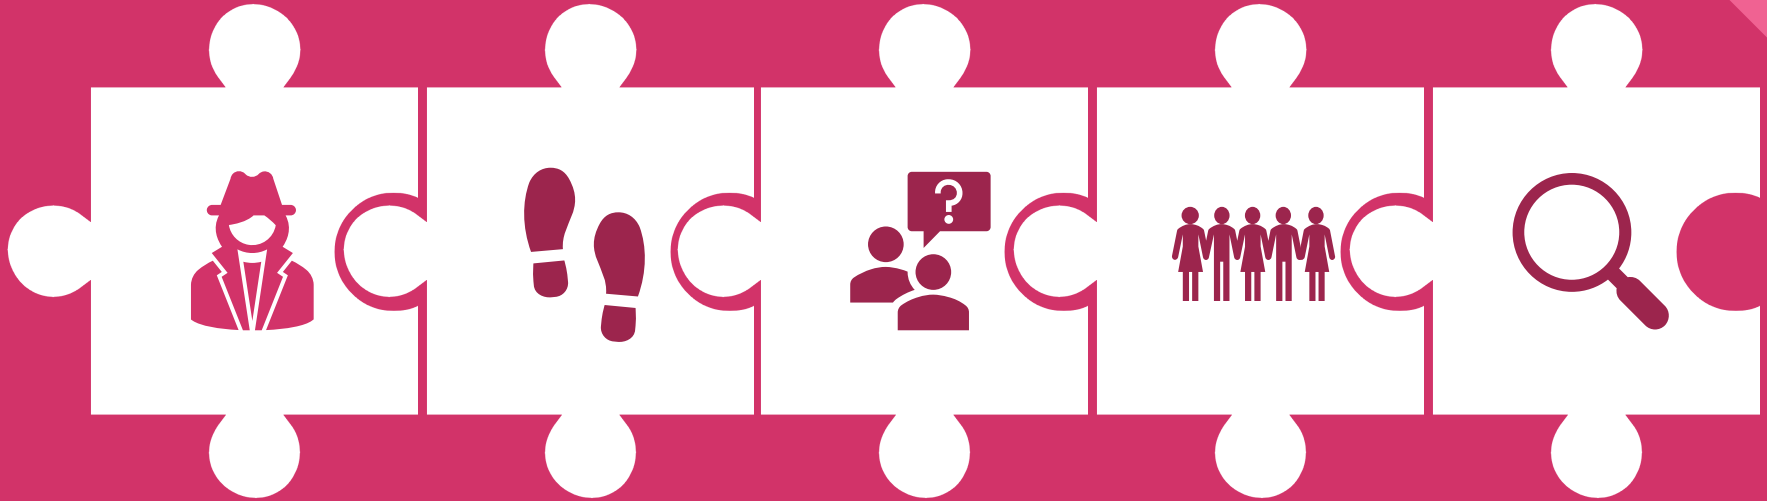

Conditions met before exploration:

1. cues of safety
2. signals of non-seriousness
3. permission to explore
4. role separation

Exploration

Why it works:

[Octalysis] Unpredictability & Curiosity

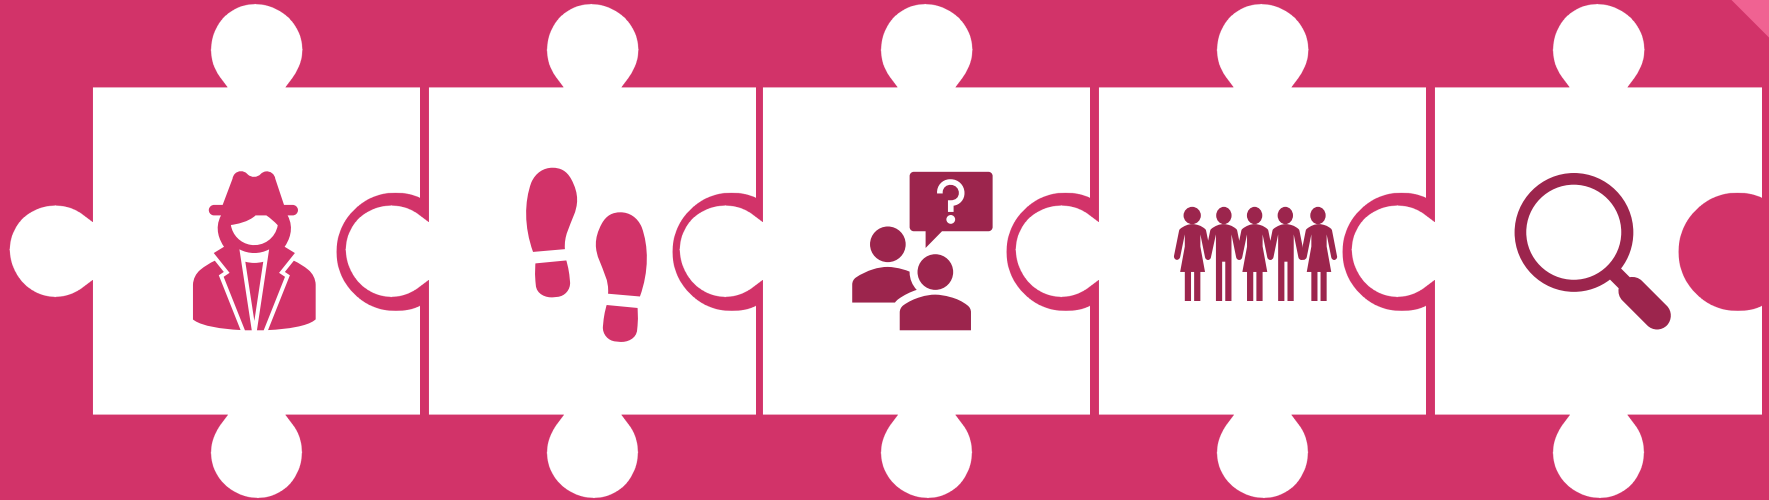

Hide Your Badge!

Exploration

Why it works:

[Play personality] Kinesthete.

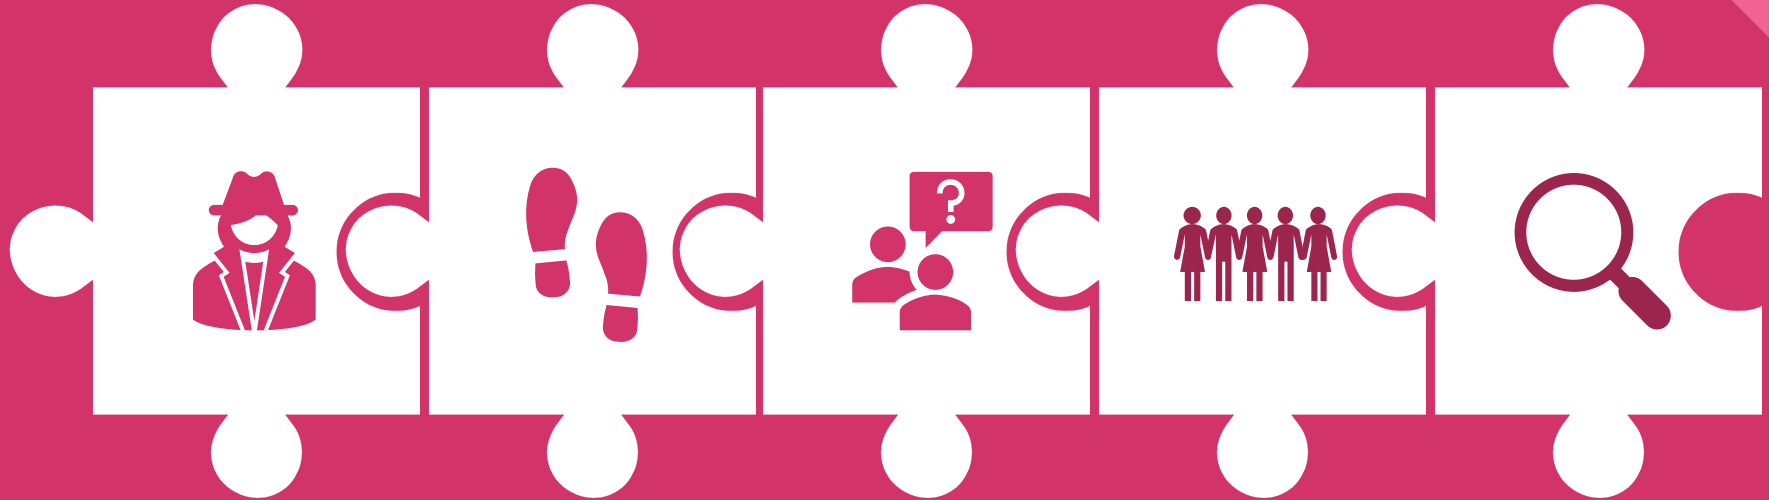

3 Steps Out of Your Comfort Zone!

Exploration

Why it works:

Micro-interactions -> creates quick interpersonal bonding

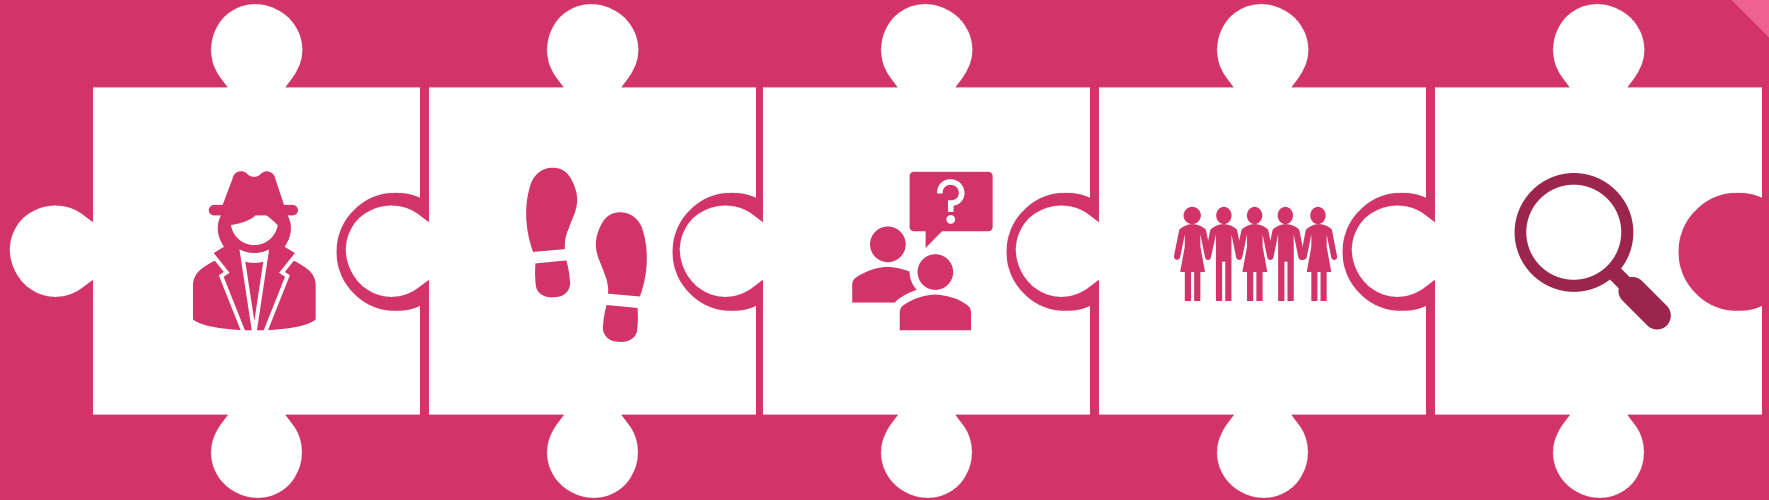

Who is Who? Guess The Animal

Exploration

Why it works:

Octalysis CD5 (Social Influence & Relatedness)

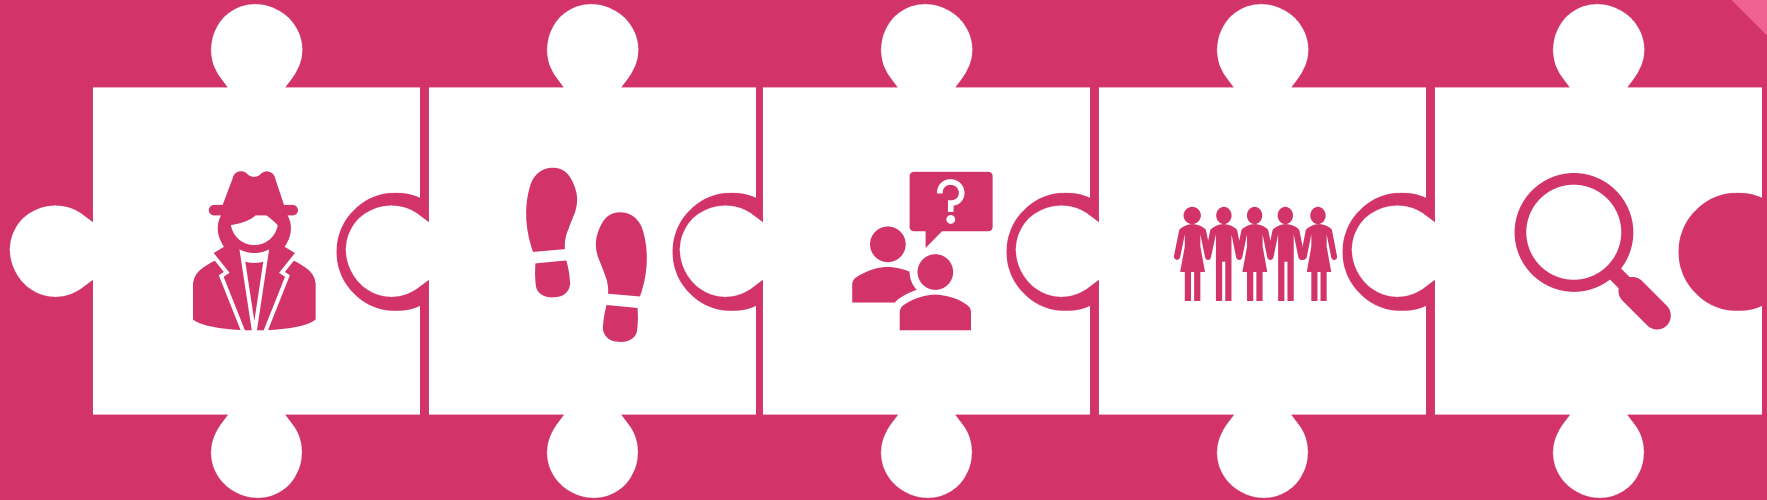

Team Up, One of Each Animal

Exploration

Why it works:

Searching for prompt pieces activates **exploratory** play, boosting dopamine and engagement

Search! Find Your Animals Trinket For the Team!

Immersion

Why it works:

Using objects -> embodied cognition, boosting creativity and meaning.

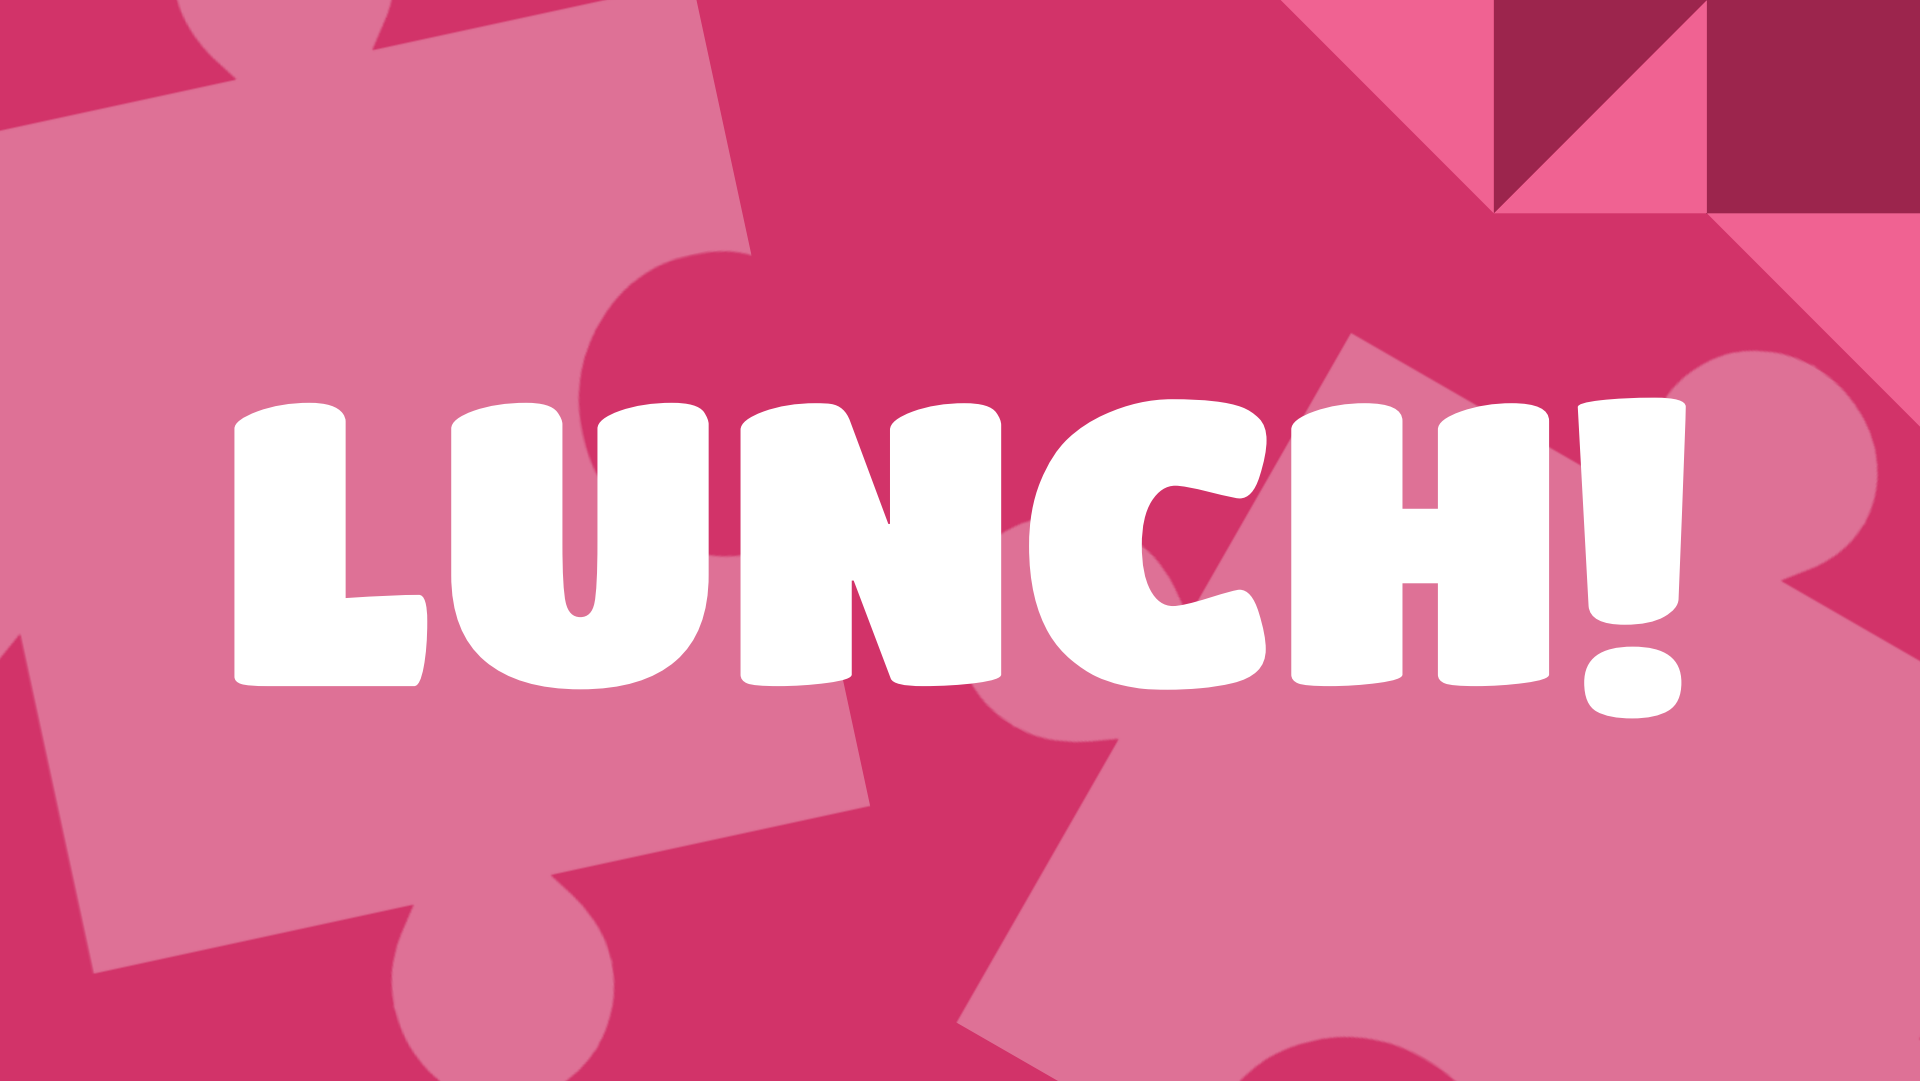

Collaborative play increases **psychological safety** and enhances creative problem-solving.

Support **social bonding** via **storytelling**, activate Octalysis **CD5 (Social Relatedness)**

**Find a Solution To
the Prompt
Together**

**Piece Together the
Prompt From the
Trinkets**

**Quickly Present Your
Solution In Smaller
“Groups of Groups”**

The background is a vibrant collage of various shades of pink and magenta. It features a mix of geometric shapes, including triangles, circles, and polygons, some of which are overlapping. The overall effect is a dynamic and modern abstract pattern. In the center of the image, the word "LUNCH!" is written in a large, bold, white, sans-serif font. The exclamation mark is particularly prominent, adding a sense of urgency or excitement to the message.

LUNCH!

Prompt example

- Case generator: 1 prompt piece per team member, roles locked.

In Katthammarsvik the activist locals that hate tourists wants warm clothes on Stockholmsveckan.

Outcome:	In Katthammarsvik	the activist	locals that hate tourists	wants warm clothes	on Stockholmsveckan.
rerollOutcome:	In Visby innerstad	the singing	horses	wants clean water	during during Summer.
Array	Where? (add in/at)	Adjective for who	Who?	Want what?	When? (add preposition)
	In Gråbo	sleepy	sheep	a zoo	tomorrow
	In Binneby	greedy	tourists	alcohol	on Medeltidsveckan
	At Fårö	singing	Swedish family	cheap housing	on Stockholmsveckan
	In Visby innerstad	sad	locals that hate tourists	CSN	on Almedalsveckan
	In Kappelshamn	angry	entrepreneurs	clean water	on February
	At Stora torget	excited	parents	cultural activities	during Christmas
	In Katthammarsvik	old	politicians	free food	by New year
	In Slite	young	students	billions of dollars	by Spring
	In Hoburgen	rich	horses	a significant other	on Autumn
	At Almedalen	poor	chefs	warm clothes	during Summer
	At Donners plats	activist	hotel owners	adventure	during Winter

At Fårö the old chefs wants a significant other on Almedalsveckan.

Showcase time!

Limitations

- Needs physical meet-up space
 - *Easier to build relationships and be playful in person*
- Doesn't necessarily work with "non-playful" individuals
 - *Needs planning. Playfulness can be learned!*
- Hard to say if it has balanced complexity
 - *Interesting without being overwhelming*

Further Development & Scaling

The solution acts as an initializer.

- **Let's call it a Trojan horse where GFB is the army inside, ready to invade Troy (their clients) with knowledge and collaboration.**

But it could be developed or expanded upon to retain and feed that first flame of interest and create a long-term invasion of improvement!

Let's look at some possibilities!

Further Development & Scaling

Ways to develop and build upon our solution:

- Review, iterate & repeat next year
 - How to give closure to the play session?
- Digitalize and make it a weekly activity
 - To not let the strategy be forgotten
 - Joel could make a small executable

**Thank
you!**
